Re: Quarterly Report of Progress – Kings County CUPA

This letter is in response to an Evaluation Team request for an additional progress report regarding business plan inspection frequencies noted in the most recent CUPA Evaluation Report dated April 5, 2005. The following comments will serve as a final progress report in response to this request.

Deficiency #1 – The CUPA inspection frequencies are not being met for the Hazardous Waste and Business Plan programs.

Our final routine inspection totals for FY 2006-07 (July 1, 2006 to July 1, 2007) shows that we completed 233 routine inspections in the Business Plan program and 147 routine inspections in the hazardous waste generator program. Our year end inventory shows 651 active business plan facilities, 367 of which are also hazardous waste generators, thus we have been able to maintain the required triennial inspection frequency in both programs. Our Environmental Health Services Division continues to be fully staffed. We consider this deficiency satisfactorily corrected.

Since all remaining previously reported deficiencies have been corrected we would request that further quarterly progress report updates be suspended until the next CUPA evaluation of our program.

Sincerely,

Tim L. Fillmore, REHS
Supervising Environmental Health Officer
